To achieve maximum results, it is important to use the proper package size for each tire. The amount of Counteract per tire is based on one ounce per thirteen pounds of tire and rim combination. If you are using our throw in bags, open and discard outside bag only, and throw clear inner bag directly into the tire. It is imperative that none of the contents of the bag end up on the bead seating area of the tire and rim. In order to reduce the possibility of valve leaks, the use of Counteract's Vortex Valve Core, and Counteract Valve Cap is recommended. The core and cap are included in every bag of Counteract. Counteract is TPMS safe and compatible. Always wear safety glasses when installing CBB. Counteract disclaims any responsibility for air loss or tire damage due to improper installation or air check.

JUST THROW IT IN!

TPMS
